Tanlac helped me back to good health two years ago and I am still feeling fine," recently said Mrs. Mabel Francis, highly esteemed resident of 628 S. Linwood Ave., Baltimore, Maryland.

"Before taking the medicine I suffered from a nervous breakdown and was in an awful condition. I scarcely had strength and energy to handle a broom and my housework was drudgery to me.

"The first bottle of Tanlac made such a wonderful improvement in my condition that I was both surprised and delighted. So I stuck to it and a few bottles built me up ten pounds and made me feel as if I had never had a sick day. My health has been fine ever since."

NOTE—The International Proprietary Co., distributors of Tanlac, have on file in their offices at Atlanta, Georgia, over fifty thousand signed statements from representative men and women from every State in the Union and every Province of Canada. Many of these are from prominent people in this city and section and have been previously published in this paper.

Tanlac is sold by all good druggists.

would be sufficient to rank him among the constructive agencies of the modern world.

"In this city of old memories and now of strikingly new plans Greek life centers as in its classic days; and here ancient and modern Greece are inextricably mingled in a curious medley of modernity and antiquity, which colors the most ordinary of every-day affairs. On every hand arise shattered monuments of its splendid past, and even the tiniest fragments which serve to unite the life of the present with the days that are gone are most carefully preserved.

"The Greek government has been keenly alive to its responsibility for the safeguarding of its antiquities, and the Department of Archaeology, under the charge of the Ministry of Education and Religion is painstakingly organized and prudently administered. The museums at Athens are handsomely housed, conveniently arranged, accurately catalogued, and open to inspection and study without fee, this latter being a point of great pride with Athenians.

In addition there are now, at various points in the kingdom where research is going on, smaller museums devoted to the preservation of the treasures of the locality.

"Crowning the city stands the shorn and mighty rock of the Acropolis, maintained by the Parthenon, matchless even in its ruins, projecting the changeless purity of its lines against the background of the changing centuries, which have made of it in turn the shrine of the vestal, the church of the Christian, the mosque of the Moslem, and now and ever the ideal of all lovers of the beautiful.

"Near at hand cluster the chief remnants of the glory that was Greece; on the one side the tiny gem of the Temple of the Wingless Victory, so chaste and delicate in its proportions and outline, and on the other the Erechtheum, with its unique Porch of the Caryatides.

"Hard by the stairs of the imposing Propylaea rises the stony rock of the Hill of Mars, whence St. Paul declared the Unknown God. At a little distance stands the rough-hewn arena where Demosthenes and Cicero strove

Lacking Human Sympathy.

Most of us have come across people, otherwise good, but lacking entirely in the softer human qualities. They are austere, feelingless, hard, utterly devoid of sympathy. And, all because they have been denied that gift of affection when they were in the molding. Statistics prove that children from institutions are sadly lacking in affection. It is one of the greatest problems social workers must deal with.—Exchange.

Certainly Not!

A plumber's bill at Boston included the item: "To a man and boy looking for a small, \$1.75." They probably agreed that the remuneration was not to be sniffed at.

To borrow is human; to forget all about it is still more so.
